DETAILED ACTION

Applicant's arguments filed 6/8/06 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 3,939,825 ('825).

Figures 1-3 illustrate the embodiments which are considered to read on the rejected claims. Figure 3 shows a cleaning device having two foot receptacles (23) which include a plurality of cleaning pieces (27) which are positioned and constructed to form a chamber having sides, bottom, top, front and rear surfaces. The device also includes a liquid dispensing assembly including source of medicated liquid, a pump (49) and a nozzle (47). See col.4, lines 48 thru col.5, line 8. The device also includes brushes (28) as defined in claim 2. Figure 1 shows that the brushes are positioned and arranged as defined in claim 9.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 3,939,825 ('825) in view of the abstract of JP 2001224653 A.

The JP abstract discloses a device for cleaning feet which includes rotating brushes (4). It would have been obvious to one skilled in the art to replace the scrubbing brushes (28) in the '825 patent with the rotating brushes (24) disclosed in the Wheelwright publication in view of the rotating brushes use for cleaning feet.

Regarding providing a plurality of brushed, *In re Harza*, 274 F.2d 669, 124 USPQ 378 (CCPA 1960) the court held that mere duplication of parts has no patentable significance unless a new and unexpected result is produced.

Response to Arguments

Applicant argues that USP 3,939,825 does not teach or suggest "a foot receptacle including a **top surface**". The examiner respectfully disagrees. Figure 3, a cross-sectional view, clearly shows a horizontal flange which extends circumferentially.

Applicant's arguments considered US publication 2005/0211270 was persuasive and the reference has been withdrawn.

Allowable Subject Matter

Claims 6-8,10-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1744

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
